

electrical diagram

1. the consultation can be started

2. connection diagrams area

3. information about a component

4. to highlight a component

Connection diagrams area

The connection diagram of the system or of the selected component is displayed. The connection diagram area can be selected. The following operations can be carried out:

- scroll the diagram
- expand or reduce the display of the connection diagram
- highlight on the connection diagram a specified component
- obtain information about a selected component
- colour display the connection diagram (COLOUR key)

**Scroll the diagram**  
 select a point of the diagram and, without releasing the pointer, (mouse/touch screen pen) drag the selection in the desired direction

	<b>key !:!</b> shows the diagram in full screen (100%); select it to come back to the whole pattern
	<b>ZOOM OUT key</b> reduces the display of the diagram: it is active only after enlarging
	<b>ZOOM IN key</b> enables you to move in closer into a specific area
	<b>SEARCH key</b> allows to highlight a selected component on the electrical diagram
	<b>COLOUR key</b>

1. the consultation can be started

2. connection diagrams area

3. information about a component

4. to highlight a component

Information about a component of the connection diagram

1. select the component on which you want information

2. the available information are displayed (the information type depends on the examined component)

Information type available for the connection components	
IMAGE	picture of the component
LOCATION	position of the vehicle
DETAILS	info about the component
ACCESS	way to access the component
CONNECTORS	pin-out
GENERAL DIAGRAM	system diagram
GROUP	components list belonging to a same category

3. select the information type you want to consult

4. select the **NAVIGATION** key **BACK** to return to the display of the connection diagram

electrical diagram

- 1. the consultation can be started
- 2. connection diagrams area
- 3. information about a component
- 4. to highlight a component

Highlight a component on the diagram

1. select the **SEARCH** key

- 2. scroll the list of the components (which appear on the examined diagram); use the **BROWSE** keys to display all elements of the list
- 3. select the component you want to position on the diagram; confirm by selecting the **TICK** icon

The position of the selected component is indicated on the connection diagram by a **red arrow**
